# **1. Introduction**

The overall objective of the Admin module is to follow a comprehensive approach to manage the camp details so as to manage the base of entire application. Camp details captures the camp name, location and other details on monthly basis. These details are further available for updation as well. These camp details are further used for registration and appointment of patient.

## **2. Brief Overview**

### **2.1 Features**

This module manages the following features:

- Create camp plan

### **2.2 Target Users**

The following users can access the admin module:

1. Admin

## **3. Detailed requirement**

### **3.1 Create camp plan**

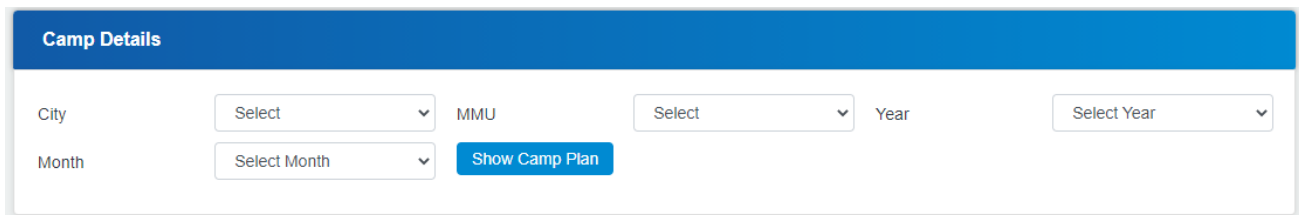

#### **3.1.1 Description**

This functionality allows the user to capture the camp plan details. Camp plan is created on monthly basis. Camp plan details are captured against city, MMU, year and month. It captures camp details including location, landmark, camp timings, latitude and longitude. These camp details will be further used for registration and appointment of patient.

#### **3.1.2 Prerequisites**

1. The user is logged-in into the application and is having access to "Create camp plan" page

### 3.1.3 Screenshot

### 3.1.4 Field Description

S. No	Field Name	Description
1	City	It refers to the city against which camp plan needs to be created
2	MMU	It refers to the MMU name against which camp plan needs to be created
3	Year	It refers to the year against which camp plan needs to be created
4	Month	It refers to the month against which camp plan needs to be created
